

MiraCosta College Secure Wi-Fi device On-boarding

Starting the process of on-boarding your device to MiraCosta's secure network requires a couple pre-requisites. Please make sure you have the following before starting.

- A valid account (students will use their SURF login, employees will use their regular MiraCosta account.)
- The Passcode for your device.
- Your device will need to have a working Apple Safari browser, no other browser is supported.
- Your device will need to be connected to your carrier's data network OR connected to MiraCosta's open non-secure MiraCosta-WIFI network.

Launch Safari on your device, and go to

<https://cloud.securew2.com/public/70901/mcc-secure-wifi/>

- You should see this webpage.
- The system should recognize that you are an iOS user.
- If you are not using Safari you will be prompted to start again in the Safari browser.

Click the 'Sign In' button, you will be re-directed to our SingleSignOn service, Okta.

A screenshot of the MiraCosta College Login page. It features the MiraCosta College logo at the top. Below the logo, the text "MiraCosta College Login" is displayed. There are two input fields: "Surf ID (MiraCosta Username)" and "Password". Below the password field is a "Remember me" checkbox. At the bottom of the form is a blue "Sign In" button.

- Students: Use your SURF ID and password.
- Staff: Use your regular MiraCosta account.

After you enter your credentials and click 'Login' the system will authenticate you and take you back to the first website, where the 'Sign In' button will now say 'JoinNow'.

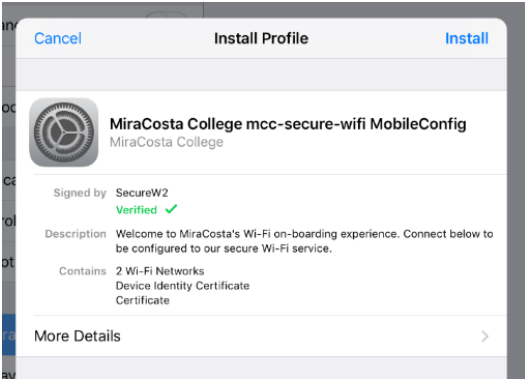

Click the 'JoinNow' button.

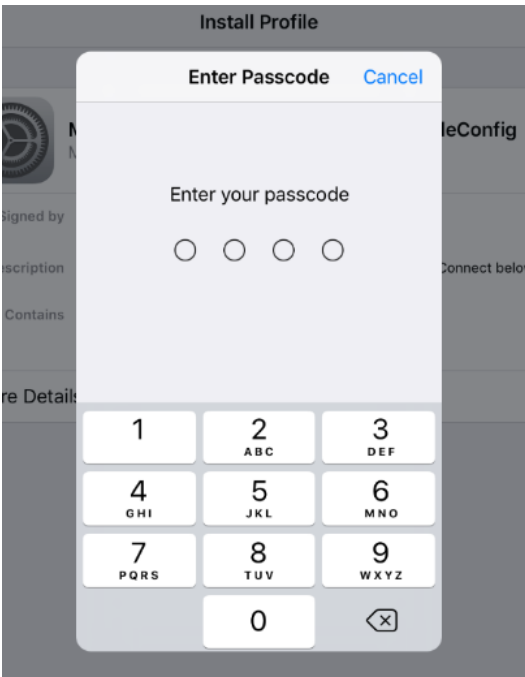

A popup will appear requesting you to allow the website and Safari to open your device's settings menu, click 'Allow'.

You will be taken to your device's settings menu where you will click 'Install' to install your profile.

Your device will require you to type in your PIN.

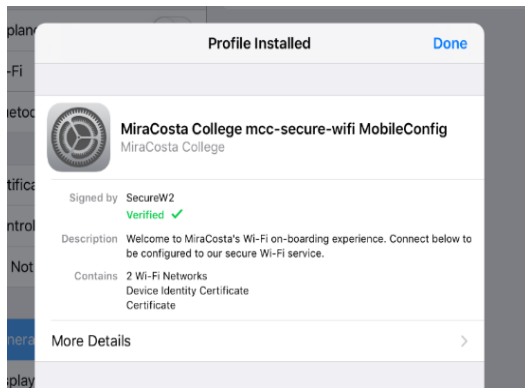

- If you do not have access to your Passcode, please visit this apple site for help.
- <https://support.apple.com/en-us/HT204306>

Now click 'Install' to install your profile to your device.

The system will enroll the certificate on your device and result in this page where you can click 'Done' but you are NOT done yet.

- If you click more details you will see the following.
- A Wi-Fi configuration telling your device to use mcc-secure-wifi.
- A Wi-Fi configuration telling your device to not use the public WiFi.
- Certificates that the device uses to authenticate you to the network.

After you click 'Done' you will end up at this webpage with a few more instructions for you to follow.

After configuring your iOS device, you may still need to connect to the "mcc-secure-wifi" network:

To connect:

1. Go to your home screen and tap the "Settings" icon.
2. Tap "Wi-Fi".
3. Disable "Wi-Fi" by tapping on the green slider to the right. This will turn grey.
4. Then, Enable "Wi-Fi" by re-selecting the slider. This will now turn green.
5. If you've not automatically connected to the "mcc-secure-wifi" network, please select it manually from the list of networks and connect.

When you have successfully connected, a small check mark will appear next to the "mcc-secure-wifi" network.

Help Powered by SecureW2

- Go to your home screen and tap the 'Settings' icon.
- Tap 'Wi-Fi'.
- Disable Wi-Fi by tapping on the green slider.
- Enable Wi-Fi by tapping the green slider.
- You should now be connected to mcc-secure-wifi.
